Paper Christmas Ornaments

November 7, 2020 | By Julie Fei-Fan Balzer | Home Décor, Paper Crafting

Opinion by Paid Consultant

I made some super fun Christmas ornaments using my **ScanNCut DX** cutting machine, black watercolor paper, and interference watercolor paints! Check it out and learn how to make your very own paper Christmas ornaments!

These are super easy to make:

STEP ONE: Cut 3-5 identical symmetrical shapes, like a circle.

You'll note that my circles have a perforation down the middle, but they don't have to. You can easily add a perforation line using [CanvasWorkspace](#) or the built-in editing functions in your ScanNCut machine.

STEP TWO: Color the shapes with sparkly watercolors.

STEP THREE: After they've dried, fold the shapes in half.

STEP FOUR: Glue the shapes back-to-back (unpainted side) to each other and put a string through the middle before you glue the last piece in.

You can add a tassel or some beads to the bottom of the ornament if you want.

How easy is that?! I hope you'll give this project a try!
